

Oxygen & Argon Works Ltd.	Spec.No.G-09.001	
Product Purchasing Control	Issue: B	Date:14.02.2008
GAS SPECIFICATION	Sheet 1 of 1	

DISSOLVED ACETYLENE - Technical

Typical Impurity Limits:

PH ₃ :	≤ 500 ppm
H ₂ S:	≤ 500 ppm

Above specification applies to Dissolved Acetylene for gas welding and cutting purposes.

This grade meets the requirements of Israel standard 477, for Technical Dissolved Acetylene.

Quality Assurance - According to Suppliers' QC procedures.

Manufacture - By the reaction of water with calcium carbide.

Packing & Distribution - In cylinders as a gas dissolved in acetone held in a porous support media.

Valve Outlet - According to IS 637 part 3. [Yoke type]

Approved Supplier - Maxima Ltd.
